

Excel Guide 2

You work for a company called Hothouse Design. You are going to manipulate a spreadsheet about some holiday bookings for a client called The Relaxing Holiday Company.

Task 1 – Evidence

- 1 Create an evidence document called EVIDENCE followed by your candidate number.
 - Make sure that your name, Centre number and candidate number will appear on every page of your Evidence Document by placing these details in the header of the document.

Task 2 – Spreadsheet

1. Using a suitable software package, load the file NXSHEET.CSV
- 2 Place your name, candidate number and Centre number in the header.
- 3 Save the file with appropriate type using the name NXSHEET followed by your candidate number.
- 4 In the *Destination* column use a lookup function to show the destination name in full. Use the *Code* column for the lookup value and the file NXDEST.CSV for the array.

This function must include both absolute and relative referencing and must not use a named range.

Replicate this function so that the destination name is shown in full for each of the codes.
- 5 In the Mcode column, use a lookup function to show the Mcode of each month. Use the Month column for the lookup value and the file NXM.CSV for the array.

This function must include both absolute and relative referencing and must not use a named range.

Replicate the function.
- 6 Create a named range for the cells D25 to D98 inclusive. Call this range DC.

Take a screenshot to show this named range includes these cells. Include this screenshot in the document created in step 1.
- 7 In cell C2 use a function to count the number of trips to the destination where the value in the *Dcode* column matches the contents of cell B2.

This function must include both absolute and relative referencing and must not use a named range.

Replicate this function into cells C3 to C8 to calculate the number of trips booked to each of the other destinations.

- 8 In cell D2 use a function to add the total number of days (using the *Duration* column) booked for this destination.

This function must include both absolute and relative referencing and must not use a named range.
Replicate this function into cells D3 to D8 to calculate the total number of days booked for the other destinations.
- 9 In cell E2 use a formula to calculate the average duration of the holidays booked to this destination. Use the values in cells C2 and D2 to help you.

Round this value to a whole number. Replicate this formula into cells E3 to E8.
- 10 Set the page orientation to landscape.
- 11 Save the data model and print a copy of cells A1 to E8 only, showing the formulae used. Make sure that the contents of all these cells are visible and that the printout fits on a single page wide.

Make sure that your name, Centre number and candidate number are printed in the header of the page.
- 12 Format only the cells in rows 1 and 24 to be right aligned, underlined, italic and bold.
- 13 Format only the cells in rows 1 and 24 so that they are.
Print the sheet showing the functions and formulae used

Make sure that all contents are visible and landscape

Make sure all gridlines, column and row headings are visible

Make sure that all columns appear on one page

Make sure that all your pages contain your name, centre number and candidate number
- 14 Set the page orientation to portrait.
- 15 Hide rows 10 to 23 inclusive.
- 16 Print the sheet showing the values

Make sure that the row and column headings are not visible.

Make sure that all columns appear on one page

Make sure that your name, Centre number and candidate number are printed in the header.
- 17 Hide rows from 1 to 9
- 18 Interrogate the data to find all the items where the Dcode is CUB or USA and the discount is Y. Print this data, showing the values and labels in full.

Make sure that your name, Centre number and candidate number are printed in the header of the page.

Task 3 – Submitting

1. Save and print your evidence document
2. Create a new folder in your work area
3. Rename the folder with your name
4. Add all your printouts to the folder
5. Compress the folder
6. Submit your zipped folder through our website
